01531784

A process for providing access of a client to a content provider server
under control of a resource locator server

Verfahren zum Bereitstellen von Kundenzugriff auf einen inhaltsanbietenden
Server unter Kontrolle eines ressourcenlokalisierenden Servers

Procede permettant au client d'accéder au serveur fournisseur de contenus
sous controle d'un serveur localisateur de ressources

PATENT ASSIGNEE:

Castify Networks SA, (3393320), 2229 Route des Cretes, 06400 Valbonne -
Sophia Antipolis, (FR), (Proprietor designated states: all)

INVENTOR:

Legout, Arnaud, Residence Les Alizes, Entree B, 200 Chemin de la
Parouquine, 06600 Antibes, (FR)

Humme, Jakob, 24 avenue de la Rostagne, 06160 Juan Les Pins, (FR)

LEGAL REPRESENTATIVE:

Cabinet Hirsch (101611), 34, Rue de Bassano, 75008 Paris, (FR)

PATENT (CC, No, Kind, Date): EP 1278112 A1 030122 (Basic)

EP 1278112 B1 030528

APPLICATION (CC, No, Date): EP 2001401870 010712;

INTERNATIONAL PATENT CLASS: G06F-001/00

...SPECIFICATION above cannot be applied.

US-A-5 870 546 is directed to the problem of **determining** the
efficiency of **advertising** displayed to a client over a network;
efficiency is **measured** as the number of times a client pursues the
URL displayed in a server. A Web server system displaying the
advertisement provides a client system with a **URL** reference to the
advertised server. The **URL** reference is encoded with predetermined
redirection and accounting data. On receipt by the **advertised** server,
the **URL** reference is decoded and the accounting data is stored. This
makes it possible for the **advertised** server to identify the number of
URL displayed in the Web server system displaying the **advertisement**
which are effectively pursued by the client. This document does not
contemplate any use other...

...SPECIFICATION above cannot be applied.

Detailed Description

Detailed Description

... The same holds true for can-top advertising. In order to assist a company in determining the effectiveness of their can-top advertising campaign, certain information can be placed on the can-top advertisement to give the company feedback on the particular ad campaign. In one embodiment, this information consists of a web address and an identifier. An example of such information is presented on the label

shown in...

Detailed Description

Detailed Description

... included in biddable ad 200A is a phone number 206A which can be used for **tracking** consumer **responses** to the biddable ad 200A. The biddable **advertisement** 200A can also include a **web** page **address** 208A to provide for consumer response to the **advertising** placement via the internet. The **web** page **address** is generally directed to a web page of the service provider 100 and can either include additional content for an **advertiser** or can provide a redirection to an advertiser's website.

The service provider phone number...2B. Biddable ad 200B has an overall size defined by box 202B and can accommodate **advertiser** content of the size defined by box 204B. Also included in biddable ad 200B is a phone number 206B and or **web** page **address** 208B which is specified by the service provider and is used for receiving and **tracking** consumer **responses** to ad 200B. A content descriptor 203B 1 5 can also be provided in the advertising placement...as newspapers, magazines, conventional billboards and the like, where interactive functionality is not available for **response** **tracking**.

Also illustrated in Figures 2A and 2B, **advertising** placements can include **web** page **addresses** 208A and 208B which can be directed to web pages hosted by the server cluster...

Detailed Description

... This allows the identification of the initial source of a visitor
assuming that an IXC URL is used for each of the sources of visitor
traffic: Search Results, Banner Advertisements, Affiliate Links,
Email campaigns. Visitor traffic that arrives directly at the actual
website will have a source identification of the first tracking IXC URL
that it comes across - this identifies where the visitor was first
noticed.

With the trackers in place, visitor traffic can be reported on with
the following information.

Initial source of the visitor traffic...

Detailed Description

... MARKETING CAMPAIGNS

FIELD OF THE INVENTION

The invention relates to a method and apparatus for **measuring** the
effectiveness of an Internet-based **advertising** or marketing campaign.

BACKGROUND OF THE INVENTION

The Internet has only relatively recently become a medium for mass
communication.

The hypertext transfer protocol (" **http** ") is an important part of the
Internet, enabling pages of multimedia information to be communicated...
and the destination web site.

In a fifth aspect, the invention provides a method for **measuring** the
effectiveness of an Internet-based **advertising** campaign. The method
stores in a destination **URL** table a list of destination **URLs** and
corresponding destination **URL** identifiers, stores as an e-mail
recipient table in a database a list of e...

Claim

... 6, wherein recording the actuation of a given said link includes
storing the recipient, destination **URL** , and mailing identities received
along with the web site request message in a log.

8 A method for conducting a computer network-based **advertising**
campaign. and

measuring the **effectiveness** thereof, said method comprising:
sending at least one e-mail message to a plurality of...to the identities

of the recipient and the destination web site.

17 A method for **measuring** the **effectiveness** of an Internet-based **advertising** campaign, comprising:
storing in a destination **URL** table a list of destination **URLs** and corresponding destination **URL** identifiers;
storing an e-mail recipient table in a database a list of e-mail...

English Abstract

...to a third party (30) and the third party communicates the commercials to the prospects, **tracks** any **response**, and reports the results to the **advertiser** (10). The commercials may include a **hyperlink** to a web site, and initiate a substantially synchronous link such as a telephone call or chat room exchange between the prospect and the **advertiser** (10).

Detailed Description

Detailed Description
... the Internet) has prevented these
marketing tools from being used to their full potential,
Since HTTP or Web servers cannot automatically determine
the amount of time and the frequency at which particular
users interact with their resources, Web site
administrators and advertisers cannot accurately determine
the effectiveness of their resources. Since servers cannot
automatically monitor user interaction and automatically
obtain user preferences...

Detailed Description

... view

logs that are easy to upload to the back office. In one example, the `ad` view log is simply a log of all viewing events, with the `ad` viewed, the time and date, and what `URL` the user clicked. The entire `log` should have an `effective` start date as well.

The back office preferably is separate from the content server that...
